## When security matters... Secure your signature with uni Super Ink™.

uni Super Ink™ is pigment ink that's permanent once it's dry. This means that your signature is secure. Important information or legal documents can't be changed and your signature can't be removed.

uni Super Ink™ offers outstanding light resistance, water resistance, bleaching resistance, ammonium hydroxide resistance, hydrochloric acid resistance, ethanol resistance and erasure resistance.

**Permanent. Waterproof. Fadeproof. uni Super Ink™**

## uni Super Ink™

uni's unique Super Ink™ is a pigment ink that offers outstanding levels of water, chemical and light resistance.

The pigment in Super Ink™ binds with the cellulose in the paper making the ink permanent once it's dry. This means that your signature is secure. Important information or legal documents can't be changed and your signature can't be removed.

### Example: Ethanol resistance

The portion below the line was immersed in ethanol solution for ten minutes. (tested using uni UMN-207)

Complies with ISO 14145-2, the international standard governing the quality and performance of rollerball pens for use on official documents.

Look for this logo with pens containing Super Ink™

Super Ink™

# uni POWER TANK The Heavy-Duty Ballpoint Pen

- Writes clearly in any position
