

roducing the world's only
n-stop pencil.

matic advances the lead automatically.

The natural motion of your hand triggers a patented
o-action advance, constantly feeding extra-fine 0.5mm
to the tip. So instead of stopping again and again to
a button, you keep going.

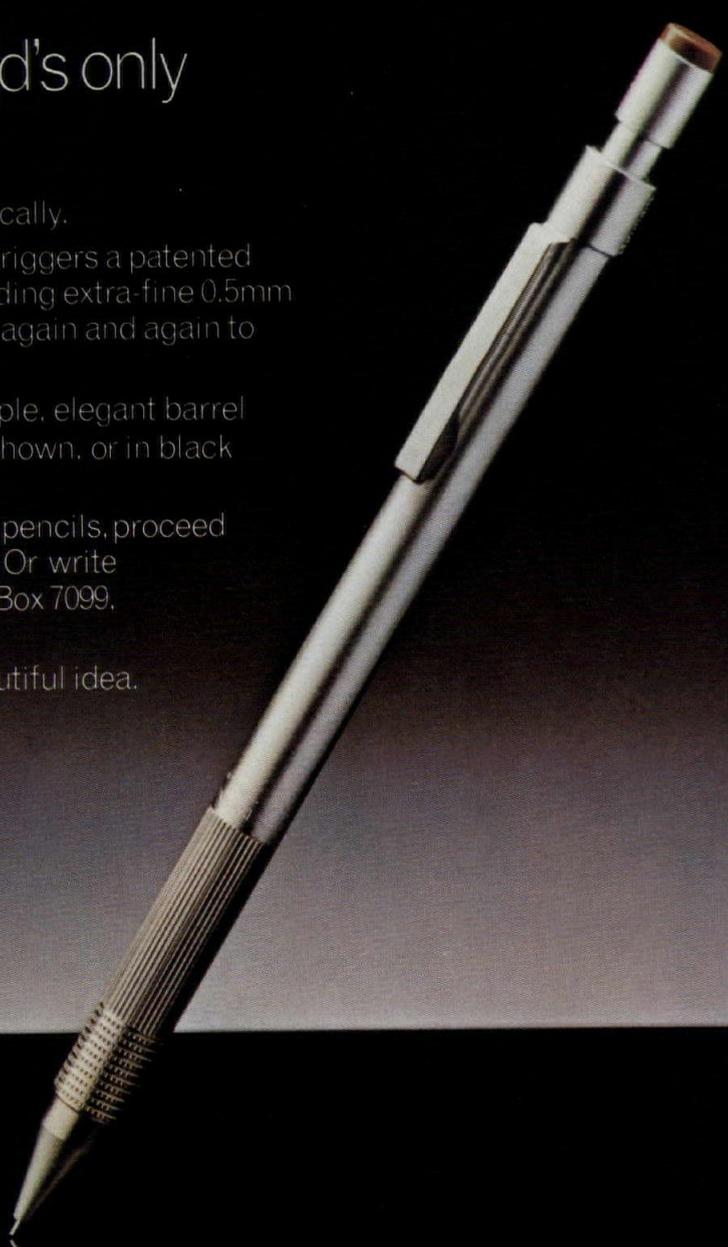

It's a brilliant system inside a simple, elegant barrel
uted in the satin-finished metal shown, or in black
brushed metal accents.

To see this incredible advance in pencils, proceed
stop to your FaberCastell Dealer. Or write
r-Castell Corporation, TK-matic, Box 7099,
ark, NJ 07107.

The non-stop TK-matic. It's a beautiful idea.
